**Amendments to the Specification**

On page 7, please amend the Abstract as follows:

A package particularly for packaging food products, comprising an inner package sheet, which individually wraps each product of the package and is composed of a coextruded film constituted by two outer layers of a styrene-butadiene copolymer resin and by a central layer chosen among ~~polythene~~ polyethylene, polypropylene and other plastic material, and an outer package sheet, which wraps around a set of products contained in their respective inner packages and is composed of a high-barrier film coupled to a paper film.

On page 3, please replace the paragraph beginning at line 2 with the following replacement paragraph:

This aim and these and other objects that will become better apparent hereinafter are achieved by a package particularly for packaging food products, characterized in that it comprises:

-- an inner package sheet, which individually wraps each product of the package and is composed of a coextruded film constituted by two outer layers of a styrene-butadiene copolymer resin and by a central layer chosen among ~~polythene~~ polyethylene, polypropylene and other plastic material, and

-- an outer package sheet, which wraps around the set of products contained in their respective inner packages and is composed of a high-barrier film coupled to a paper film.

On page 3, please replace the paragraph beginning at line 20 with the following replacement paragraph:

With reference to the figures, a package according to the invention, particularly for

packaging food products, for example candies, comprises an inner package sheet 10, which individually wraps each candy of the package and is composed of a coextruded film constituted by two outer layers, which are designated by the reference numerals 11 and 12 respectively and are made of a styrene-butadiene copolymer resin, and by a central layer 13, which is chosen among ~~polythene~~ polyethylene, polypropylene and other plastic material, and an outer package sheet 14, which wraps the set of candies contained in their respective inner packages and comprises a high-barrier film 15 that is metallized or non-metallized (i.e., treated or not with a very light surface deposition of metal), coupled to a paper film 16.

On page 4, please replace the paragraph beginning at line 8 with the following replacement paragraph:

As mentioned, the inner wrapping sheet 10 is constituted by two outer layers 11 and 12 made of a styrene-butadiene copolymer resin and by a central layer 13 chosen among ~~polythene~~ polyethylene, polypropylene or other plastic material.

On page 5, please replace the paragraph beginning at line 8 with the following paragraph:

In any case, a plurality of per se known systems of pre-cuts 17 ~~and/or~~ tabs 18 can be introduced.
